

Mudéjar Wagyu

MUDEJAR KINZUKINUSU Q7476

FATHER: KINUSURUKIKU H224
MOTHER: KINZURU E006

Register | CIB: ES090202927476

Date of birth: 21/08/2019

Breeder: MUDÉJAR WAGYU

Breed: WAGYU FULLBLOOD

DEEP PEDIGREE

FATHER LINE

Kitatsurukikudoï 007 is a line bred to the famous "Hyogo Cow", recognized by Kikutsuru as the cow that had the greatest influence on increasing the size and carcass quality of the Tajima bloodlines.

Kinusurukiku H224's dam, Blackmore Kinu Y385, is the best 100% Tajima cow in the Kinu family. Blackmore Kinu Y385 is Kikumidoï blood, which makes him an ideal cross with Kitatsurukikudoï J007 (Nakadoï blood) to maintain size and increase carcass quality. The data shows the carcass quality and weights obtained from Blackmore Kinu Y385.

MOTHER LINE

This is one of the most important and unique cow families. We identified Kinu 1 as a unique breeding cow, being the only known 100% Tajima cow and the only Okudoï bloodline to be exported from Japan. The progeny of this family, known as Kinuko, carries 75% of the Tajima lineage.

This is the ideal percentage to have in our main breeding herd to increase carcass size and weight while maintaining consistent quality.

These bloodlines are producing outstanding carcasses that go beyond marbling alone. The marbling, meat color and fat color combine to provide a beautiful piece of meat. The flavor is accentuated through a feeding process that uses natural ingredients to achieve the perfect balance between sweetness and richness.
