

Mudéjar Wagyu

MUDEJAR YASUKINZO Q7484

FATHER: KINZUHIKO M5765
MOTHER: YASUCHIYO C058

Register | CIB: ES060202927484

Date of Birth: 24/09/2019

Breeder: MUDÉJAR WAGYU

Breed: WAGYU FULLBLOOD

DEEP PEDIGREE

MATERNAL LINE

World K'S Yasufuku is the son of Yasufuku J930, sire of three of the best marbled bulls in Japan, champions in the ninth Zenkoku All-Japan Wagyu ("Wagyu Olympics") competition. Yasufuku JR has produced many calves, and this particular sire has been a major contributor to the Japanese Black Wagyu breed.

This bull produces great cattle with robust bodies and the most desirable genotype (AA) for SCD testing for healthy fat marbling.

Asayake Shinnen is a son of Kikuhana, in turn a son of Haruki II,

one of the two bulls that left Japan in 1993, with great opposition from Japanese breeders who wanted to shield their market. He has a combination of the three bloodlines (Tajima, Kedaka, Kujiyoshi). It is a line of animals with very tender meat.

TERUYAMANAMI: Son of KITATERUYASUDOI is #4 in marbling in the USA. He is one of the three founding sires of the famous Westholme Wagyu herd. With great predisposition to strong carcass size and very desirable coat. He is a son of Terunaga Doi J1472, a preeminent bull of the Tajima line and the most famous son of Kikuteru Doi. Terunaga Doi lived to be 16 years old producing over 20,000 descendants. Famous throughout Japan, a monument was built to honor his descendants. Great transmitter of maternal traits. BreedPlan figures show his abilities: in the top 2% for birth weight and in the top 1% for gestation length and marbling fineness. In the top 2% for marbling.
